

Capacity to use high technology

Every student in our college should learn to know how to use the latest technologies for aiding his or her learning process. Universities should equip themselves with adequate computing equipment, laboratory equipments, and Internet facilities and provide an environment for the students to enhance their learning ability. In the midst of all the technological innovations and revolutions we cannot think that the role of the teachers will be diminished. In fact the teacher will become even more important and the whole world of education will become teacher assisted and would help in? tele-porting? the best teacher to every nook and corner of the country and propagate the knowledge.

Entrepreneurship

The aptitude for entrepreneurship should be cultivated right from the beginning and in the university environment. We must teach our students to take calculated risks for the sake of larger gain, but within the ethos of good business. They should also cultivate a disposition to do things right. This capacity will enable them to take up challenging tasks later.

Moral leadership

Moral leadership involves two aspects. First it requires the ability to have compelling and powerful dreams or visions of human betterment. Moral leadership requires a disposition to do the right thing and

influence others also to do right things.

In sum, inquiry, creativity, technology, entrepreneurial and moral leadership are the five capacities required to be built through the education process. If we develop in all our students these five capacities, we will produce? Autonomous Learner? a self-directed, self controlled, lifelong learner who will have the capacity to both, respect authority and at the same time is capable of questioning authority, in an appropriate manner. These are the leaders who would work together as a? Self-organizing

Network? and transform any State as a prosperous State. The most important part of the education is to imbibe the confidence among the students is the spirit of? we can do it? These capacities will enable the students to meet the challenges of our national mission of transforming the nation into a developed country by 2020. The education system in the university must aim to generate large number of entrepreneurs apart from those students who have an aptitude towards research.
